PACKAGING MANAGEMENT

Added Value through multiple use!

comepack offers integrated solutions as well as solutions as modular components – exactly as you need it. We focus on your objectives and develop a cost-effective and efficient returnable

logistics system that can be fully integrated into your internal processes. The Result is an integrated network between all your plants, suppliers and you.

Logistics:

- Order entry
- Administration
- Storage
- Delivery and collection
- Completion of customs formalities
- Selecting and commissioning transporters/ forwarders

Product services:

- Development of bins and trays
- Leasing bins
- Selling bins

Consulting and management:

- Pool outsourcing
- Design and planning of individually tailor made returnable logistics systems
- Implementation, optimization and management of returnable logistics systems

Cleaning:

- Comprehensive network of modern and environmentally friendly cleaning facilities
- DIN ISO 14001:2004 certified
- Cleaning capacity for small and big bins, pallets and trays
- Repair and maintenance
- Sorting and picking

Key data:

- A member of 'Roman Mayer Logistik Group'
- Founded in 1993
- 150 employees
- 120 million Euro turnover per annum
- 12 million bin cycles per annum
- 13 full automatic cleaning machines
- 8 company service centers owned worldwide

BIN MANAGEMENT SOFTWARE

Keep the overview!

WEB APPLICATION:

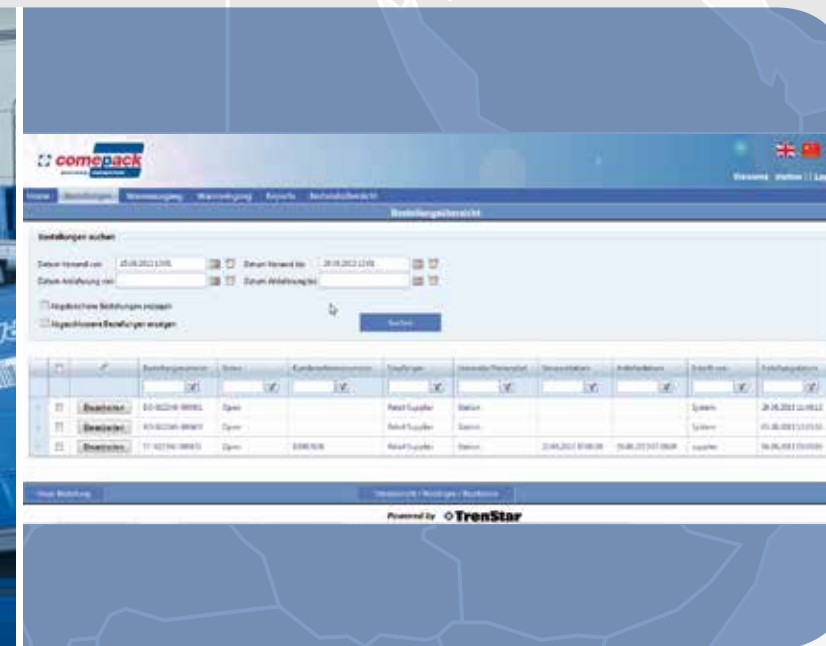

What you always wanted to know! With our web application comepack introduces a modern and intuitive management software for customers and suppliers. The web application enables you and your suppliers to centrally document all activities 24/7 and by doing so detect and control shortages, losses, misuse as

well as damages. The web application gives you important indicators to optimize your processes.

Our web application is set to become one of the key success factors of your reusable logistics.

Features and functions:

- One interface for customers and suppliers
- Multilingual and user friendly
- Real supply relationships illustrations
- Easy order and transactions processes
- Standing orders / partial orders
- Demand-oriented replenishment
- Minimum and maximum order quantity and inventory
- Email notifications for booking processes and differences
- Reporting: Inventory and transit quantity, average dwell time

SINGLE BIN TRACKING:

Give your bins a personality Single bin tracking is an extension of our web application. Bins will be detected by automated RFID reading or scanning processes. Single bin tracking offers a complete tracking of each bin and creates transparency in your supply chain. Indicators from the web application can be used to create KPI's for the improvement of your logistics!

Benefits for you:

- More transparency in the supply chain by professional management of the bin flow
- Cost savings by outsourcing and process efficiency
- More flexibility in production, transport and storage by efficient pooling and service center in your area
- Reduction of environmental pollution as a result of the "returnable" principle

Benefits for you:

- 100% transparency
- Reduction of loss
- Exact turnaround and dwelling times
- Optimized cycle volumes
- Correct allocation of costs
- Potential to reduce costs by increasing efficiency
- Valuable logistics KPI's
