

MULTI PACK

Range

The Multi Pack bins are nestable, thanks to their conical form (upper edge size is bigger than the lower edge size) and reducing therefore the empty volume. Multi Packs are rigid plastic boxes. The frame of the boxes is upended and constitute a circumferential handle bar.

Each MULTI PACK has 2 Barcodes, that can be utilized for the identification of the bins.

Thanks to the application of the MULTI-PACKs 70 % of volume is reduced in the return transport. Consequently cost-savings and slight Co2 emission arises.

Characteristics

- Space-saving (volume reducing by stacking)
- Individual Barcode-system for steorage and identification
- Hazardous goods approval
- Automatable
- Palette-appropriate
